ID

This column combination is unique only after removing 7 exact duplicate rows; on the full data it repeats.

Columns skipped because they contain blank values: Tax_Rate, Approved_By, Notes

How close each column is to a key

■ 99% or more unique (key candidate) ■ 50% to 99% ■ under 50%

Showing the 10 most unique of 16 columns.

Other available keys

1. Invoice_Number
 2. Amount + Description
 3. Amount + GL_Account
 4. Amount + Invoice_Date
 5. Amount + Net_Amount

05

Transformations *chosen and applied*

Chosen

- **Anonymization:** 2 columns (Vendor_Name, Approved_By)

What was done

- **Anonymization:** 2 columns affected

Values replaced with consistent placeholders (e.g. NAM_00001); the same value always gets the same placeholder

- **Gap Documentation:** recorded, not applied (1 column selected, data unchanged)

The gaps are documented in the report; no values were filled or rows removed
